

### ZVF 50 with Push-Twist-Lock Connection and 3/4" (ID 19 mm /OD 25 mm) Spout

#### Use:

Recommended flowrate: 50 l/min

Maximum allowed flowrate: 100 l/min

**Attention:** High flow rates may generate a strong blowback (rebound / thrust) and may cause a splashback out of the filler neck. Start the filling process with reduced flowrate by pulling the lever slightly only.

Functionality of the ZVF 50: Please read the ZVF 50 manual.

#### Assembling:

Delivery

Insertion of spout

"Click" to lock the spout

#### Strainer inspection:

Unlock spout

Remove spout

Check strainer

**PTL Spout Change Principle:**
